

Sell Smarter with Sidadiya: Seller Onboarding & Feature Guide

Sep 30, 2026 · @Shehan

Your store, your brand, one link

Turn WhatsApp and Facebook selling into a real online business: your own store, card payments, printable waybills and automatic buyer updates, built for Sri Lankan sellers.

Sidadiya exists because too many great Sri Lankan shops still run on DMs, screenshots and notebooks. We give every seller a branded online store at sidadiya.com/store/your-shop, a dashboard that turns orders into a clear pipeline, and buyer updates that answer "where is my order?" before anyone asks. You keep selling on WhatsApp, Facebook and Instagram; Sidadiya does the admin behind it, from Rs. 999 a month after a 14-day free trial.

The problem vs. the Sidadiya way

Every feature below replaces a manual job sellers told us costs them hours each week.

Today, selling only on social media	With Sidadiya
Orders lost in DMs. Sizes, addresses and payment screenshots scattered across WhatsApp chats, statuses and a notebook.	One checkout, one dashboard. Buyers order through your store in 5 short steps; every order lands in one list with the customer, items, total and payment method. Stock goes down automatically.
Handwritten waybills. Copying names, phone numbers and addresses by hand for every parcel, with mistakes and missing COD amounts.	1-click printable waybills. A6 labels with your logo, the order number, a QR code, receiver and sender details, items and the COD amount. Print one, or select many and print them together.
"Where is my order?" all day. The same questions on WhatsApp after every sale.	Automatic buyer updates. Branded emails when the order is placed, confirmed, packed, shipped (with courier and tracking number), delivered or cancelled, plus a live tracking page.

Today, selling only on social media	With Sidadiya
Payment confusion. Unverified bank slips, no receipts and cash you cannot match to orders.	Clear payments and receipts. Cash on delivery, bank transfer with your account details shown to buyers, and card payments through your own OnePay account. Every buyer gets a digital receipt link.
Looks like a side hustle. Buyers hesitate to pay a page they cannot verify.	Looks like a brand. Your logo, colours and cover photo, published refund, return, privacy and terms pages, and a Verified Sri Lankan Business badge once your ID and address are checked.

Seller feature walkthrough

Five tools run your shop from one dashboard, on your phone or your computer.

1. Seller dashboard: your shop at a glance

What it does. Opens on today's sales, orders waiting for you, product count and low-stock items, with a 7-day sales chart. A checklist shows what is left before you can accept card payments.

Why it matters. You start each day knowing exactly what to pack and what to restock, without scrolling through chats.

The seller dashboard (sample data).

2. Orders and 1-click waybills

What it does. Every order moves through clear steps: Pending, Confirmed, Processing, Ready to ship, Shipped, Delivered. Open an order to see the customer, address, items and payment, then press **Print waybill**. The button unlocks only when the name, phone, full address, city, items and COD amount are complete, and tells you what is missing. Select several orders to print a batch of A6 labels in one go.

Why it matters. No more copying addresses by hand, no parcel leaves without its COD amount, and a QR code on every label links the parcel back to its order.

Left: an order ready to ship. Right: its printed A6 waybill with QR code and COD amount (sample data).

3. Shipping and tracking

What it does. When a parcel leaves, choose the courier (Domex, Pronto Lanka, Koombiyo, Prompt Xpress, Citypak, Grasshoppers, Sri Lanka Post or your own delivery) and type the tracking number. The order is marked Shipped and the buyer gets an email with the courier, tracking number and tracking link.

Why it matters. Buyers track the parcel themselves, so your phone stays free for selling.

The seller adds the courier and tracking number; the buyer sees it on their tracking page (sample data).

4. Payments and digital receipts

What it does. Offer cash on delivery, bank transfer (your account details are shown to buyers with copy buttons) and card payments (Visa, Mastercard, Amex) through your own OnePay merchant account, paid out by OnePay to your bank. Every order gets a digital receipt link that works for 30 days; send it to the buyer on WhatsApp in one tap. Card orders show as Paid only after the payment is verified with OnePay, and refunds are recorded with a note.

Why it matters. Fewer payment disputes, a professional receipt for every sale, and card buyers you would otherwise lose.

A receipt for every order

Shop logo, items, totals and payment status. One tap sends it to the buyer on WhatsApp; the link works for 30 days.

A digital receipt, valid for 30 days (sample data).

5. Growth tools

What it does. Coupon codes and sales reports (Business and Pro). On Pro, advanced insights add **Where orders come from**: your orders counted by town or city, so you can aim Facebook and Instagram ads, delivery offers and stock at the areas that already buy from you. Also a Monday summary email with last week's sales, orders and top products, staff logins with limited access (Pro), and **Where visitors came from** (Pro): a chart and table showing how many visitors and orders came from WhatsApp, Facebook, Instagram, Google, TikTok or direct visits, for any date range.

Why it matters. Your shop data becomes a marketing plan: you know which apps bring buyers and which towns order most, so every rupee of ad money goes where it works.

Where visitors came from, last 30 days (Pro, sample data).

Where orders come from

TOWN OR CITY	ORDERS
Galle	4
Peradeniya	3
Negombo	1
Jaffna	1
Matara	1
Kurunegala	1

Know which towns buy from you

Orders counted by town or city. Aim your Facebook and Instagram ads, delivery offers and stock at the areas that already order.

Where orders come from, by town or city (Pro, sample data). Use it to target ads and delivery offers by area.

What your buyer receives

Your buyers never install an app or create an account, and every touchpoint carries your shop's name, not ours.

A store that feels like a brand. A fast, mobile-first store in your colours with your logo and cover photo, product photos they can zoom, sizes and colours to choose from, reviews from verified buyers and an Order on WhatsApp button for those who prefer to chat.

A simple checkout. Five short steps (cart, details, delivery, payment, review) with cash on delivery, bank transfer or card, promo codes, a free-delivery goal and optional shop pickup. Buyers can remove an item at any step without starting again.

Automatic emails, sent in your shop's name. Replies go straight to your email.

When	What the buyer gets
Order placed	Thank-you email with the order summary, the digital receipt link and a Track your order button
Card payment verified	Payment receipt with the OnePay reference
Confirmed	Confirmation that you have accepted the order
Packed	A heads-up that the parcel is packed and leaving soon
Shipped	Courier name, tracking number and tracking link
Delivered	Delivery confirmation and an invitation to review
Cancelled	A clear note, with your contact for any refund

A self-serve tracking page. One tap from any email opens a clean page with the order's progress (Placed, Confirmed, Packed, Shipped, Delivered), the time of each step, the courier and tracking number, and a button to WhatsApp your shop.

A digital receipt. A branded, printable receipt with the items, totals, payment method and order number. The link works for 30 days after purchase.

What the buyer sees: your store, checkout and live order tracking (sample data).

From sign-up to first order in 4 steps

Most sellers finish steps 1 to 3 in about 15 minutes; your store link works the moment you sign up.

- 1. Open your shop (about 2 minutes).** Sign up at sidadiya.com with your shop name, phone and email, then add your logo and cover photo (crop them to fit) and pick your colours and layout, with a live phone preview. Your 14-day free trial starts, no card needed.
- 2. Add your products (about 10 minutes).** Upload photos, set prices, sale prices, sizes or colours and stock, and group products into categories.
- 3. Set up payments, delivery and trust.**
 - Turn on cash on delivery and bank transfer, and add your bank details.
 - Set your delivery fee, a free-delivery amount and shop pickup.
 - Review and publish your refund, return, privacy and terms pages (ready-made templates included).

- For card payments, connect your own OnePay account in Store settings; the in-app guide lists the documents OnePay asks for.
- Optional: upload your ID and an address proof to earn the Verified Sri Lankan Business badge.

4. **Share and fulfil.** Post your store link on WhatsApp, Facebook and Instagram, confirm orders as they arrive, print waybills, hand parcels to your courier and add the tracking number. Choose a plan before the trial ends and your products, orders and settings carry straight on.

- ☐ Shop name, logo and cover added
- ☐ At least 5 products with photos and stock
- ☐ Payment methods and bank details set
- ☐ Delivery fee and pickup set
- ☐ Store policies published
- ☐ Store link shared on WhatsApp, Facebook and Instagram

Plans at a glance

Every plan starts with a 14-day free trial; pay monthly by card or bank transfer and change plans any time. Paying during the trial keeps your remaining free days.

	Starter	Business	Pro
Price per month	Rs. 999 (was Rs. 1,500)	Rs. 1,399	Rs. 2,000
Best for	Starting to sell online	Growing shops running offers	Teams that want deep insights
Store, checkout, buyer emails, tracking page, digital receipts	Yes	Yes	Yes
Waybills (single and bulk)	Yes	Yes	Yes
Card payments via your OnePay account	Yes	Yes	Yes
Monday summary email	Yes	Yes	Yes
Coupons and sales reports	No	Yes	Yes
Staff accounts and advanced insights (orders by town)	No	No	Yes
Where visitors came from	No	No	Yes

Product, category and photo limits differ by plan and are shown on the pricing page. Card payments also need an approved OnePay merchant account, which has its own fees.

Open your shop tonight

Your next order should not start in a DM thread. Set up your Sidadiya store in minutes, share one link, and let the orders, waybills, receipts and buyer updates run themselves. Start your 14-day free trial at **sidadiya.com**; no card needed, and everything you set up stays when you choose a plan.
